

MARIAM ASHRAF HASSAN

Junior Flutter Developer | Mobile Application Engineer

✉ mariam238622@gmail.com ☎ +201105201492 📍 Cairo, Egypt 🌐 GitHub 🔗 LinkedIn

SUMMARY

Junior Flutter Developer with 1+ years of experience building high-performance mobile apps using Flutter and Dart. Proven experience in developing real-time production apps, notably vmindsChatter (a real-time chat app). Deeply focused on writing clean code following Clean Architecture and managing states efficiently using BLoC/Cubit. Proficient in Firebase integration and dedicated to perfect UI/UX implementation, ensuring highly responsive and fluid user experiences.

PROFESSIONAL EXPERIENCE

Veem Solutions Project: vminds Chatter 	05/2025 – Present
<i>Mobile Application Developer Flutter developer</i>	Remote
- Developed and maintained a real-time AI-powered chat platform using Flutter and Socket.IO . - Integrated multiple AI providers (OpenAI & Gemini) for persona-based conversations. - Applied Clean Architecture with BLoC and GetIt for scalable and testable code. - Collaborated with backend and QA teams to ensure smooth delivery and UI performance.	

EDUCATION

Faculty of Computer & Information Technology at Beni-Suef University	08/2020 – 06/2024
<i>Bachelor of Information Technology</i>	
GPA: 3.0 / 4.0	

PROJECTS

vminds Chatter 	06/2025 – 04/2026
- Engineered a robust, real-time AI-powered chat platform from the ground up using Flutter and Socket.IO  for seamless messaging. - Collaborated directly with the backend team to design and implement efficient API endpoints and real-time data flows. - Implemented Clean Architecture with BLOC and GetIt, ensuring a 100% modular, testable, and maintainable codebase. - Optimized UI performance and state management, resulting in a smooth user experience for both Android and iOS versions.	
Filmora 	02/2025 – 04/2025
- Built a high-performance movie browsing application using TMDB API, featuring advanced search and filtering. - Leveraged Cubit for lightweight and efficient state management to enhance app responsiveness.	

Conducted rigorous API testing using Postman to ensure data integrity and seamless integration.	
InBrief	12/2024 – 02/2025
- Developed a dynamic news app with real-time updates and offline reading support. - Applied Repository Pattern with Cubit for state management. - Added features like category filtering, bookmarking, and dark mode UI.	
Evently	10/2024 – 12/2024
- Created a task management app with Firebase real-time synchronization. - Managed app state using Provider for efficient data handling. - Added task reminders, priority labels, and cloud storage features with modern UI design.	
Islami	09/2024 – 10/2024
- Developed an Islamic content app featuring Quran recitations, Hadith, and prayer times. - Integrated APIs for live Quran radio and prayer time calculations. - Designed a clean, intuitive UI for better user engagement.	

SKILLS
Programming Languages: — Dart , C++
Core CS Fundamentals: — OOP (Object-Oriented Programming), Data Structures, Algorithms, Problem Solving
Frameworks & Tools: — Flutter , Firebase , REST APIs , Socket.IO , SQL , Postman
State Management: — BLoC , Cubit , Provider
Databases & Storage: — Hive , SQLite , Firestore , SharedPreferences
Architecture & Best Practices: — Clean Architecture , SOLID Principles , Repository Pattern , MVVM , Dependency Injection (GetIt)
Advanced Concepts: — AI Model Integration , Dynamic AI Model Switching , Real-time Chat (Socket.IO) , Notifications , Payments , Maps , QR Codes, Mobile Ads
Design & UI/UX: — Figma , Adobe XD , Dark Mode , Responsive UI , Animation

CERTIFICATES
Flutter Development Diploma at Route Academy
Completed an intensive, hands-on training program focused on building production-ready iOS and Android applications. Gained deep expertise in Dart core programming, OOP, advanced state management (BLoC/Cubit), and Clean Architecture, while building responsive UIs and integrating REST APIs, local databases, and Firebase backend services.
